

Homework 8

1. a)

$\frac{Dec(k, c_1 \dots m_\ell)}{c_0 \leftarrow \{0, 1\}^\lambda}$ for $i = 1$ to ℓ : $m_i := F'(k, c_i \oplus c_{i-1})$ return $m'_0 m_1 \dots m_\ell$
--

b)

Libraries:

$\mathcal{L}_{\text{cpa-real}}^\Sigma$ $k \leftarrow \Sigma.\text{KeyGen}$ $\frac{CHALLENGE(m \in \Sigma.\mathcal{M}) :}{c := \Sigma.\text{Enc}(k, m)}$ return c	$\mathcal{L}_{\text{cpa-rand}}^\Sigma$ $c \leftarrow \Sigma.C(m)$ return c
--	--

Calling Program:

$\frac{Call}{m \leftarrow \{0, 1\}^\lambda}$ $a b := CHALLENGE(m)$ $x y := CHALLENGE(m)$ if $a \oplus b == x \oplus y$ return 1 return 0
--

$$\Pr[\text{Call} \diamond \text{cpa-real} = 1] = 1$$

$$\Pr[\text{Call} \diamond \text{cpa-rand} = 1] = 1/2^\lambda$$

Advantage: $1 - 1/2^\lambda$, non-negligible

2.

Libraries:

$\mathcal{L}_{\text{cpa-L}}$ $\frac{CHALLENGE(m_{L1} \dots m_{Li}, m_{R1} \dots m_{Ri}) :}{\text{if } m_L \neq m_R :}$ return err $c_0 \leftarrow \{0, 1\}^\lambda$ $c'_0 := F(k, c_0)$ for $i = 1$ to ℓ : $c_i := F(k, m_{Li} \oplus c_{i-1})$ return $c'_0 \dots c_i$
--

$\mathcal{L}_{\text{cpa-R}}$
$\underline{CHALLENGE}(m_{L1} \dots m_{Li}, m_{R1} \dots m_{Ri}) :$ $\text{if } m_L \neq m_R :$ $\quad \text{return } err$ $c_0 \leftarrow \{0, 1\}^\lambda$ $c'_0 := F(k, c_0)$ $\text{for } i = 1 \text{ to } \ell :$ $\quad c_i := F(k, m_{Ri} \oplus c_{i-1})$ $\text{return } c'_0 \dots c_i$

Calling program:

\underline{Call} $m_{L1} \dots m_{L\ell} = 0^\lambda$ $m_{R1} \dots m_{R\ell} = \{0, 1\}^\lambda$ $a b := CHALLENGE(m_{L1} \dots m_{L\ell}, m_{R1} \dots m_{R\ell})$ $\text{if } a == b$ $\quad \text{return } 1$ $\text{return } 0$

$$\Pr[\text{Call} \diamond \text{cpa-real} = 1] = 1$$

$$\Pr[\text{Call} \diamond \text{cpa-rand} = 1] = 0$$

Advantage: $1-0 = 1$, non-negligible
